

LIAZIDI IMAD

JUNIOR DEVELOPER | WEB & DATA ENTHUSIAST

CONTACT

- +212 689514712
- liazidiimad@gmail.com
- Rabat, Rabat-Salé-Kénitra, Morocco
- <https://www.linkedin.com/in/imad-liazidi-702501242/>

SKILLS

Web Development

- Frontend: Angular, React.js, HTML, CSS, TailwindCSS, JavaScript
- Backend: Express.js, Django, Laravel, Node.js
- Databases: MySQL, PostgreSQL, MongoDB

Data Science & Analytics

- Data Processing: Pandas, NumPy
- Data Visualization: Matplotlib, Seaborn, Power BI, Tableau
- Statistical Analysis & Data Modeling
- SQL for Data Analysis

Artificial Intelligence & Machine Learning

- Machine Learning: Scikit-learn, TensorFlow, Keras, PyTorch
- Deep Learning: CNNs, RNNs, LSTMs
- Natural Language Processing (NLP): Text classification, Sentiment analysis, Transformers (BERT, GPT)
- Model Deployment: FastAPI, Flask

DevOps & Cloud

- Version Control & CI/CD: Git, GitHub, GitLab CI/CD
- Containerization & Virtualization: Docker, Docker Compose, Virtual Machines
- Cloud Platforms: AWS (EC2, S3, Lambda)

Other Tools & Environments

- Development Environments: VS Code, PyCharm, Jupyter Notebook
- Networking & Operating Systems: Linux/Unix, Windows
- Agile & Project Management: Jira

LANGUAGES

- Arabe
- French
- English

PROFILE

I am a motivated beginner in computer science with skills in programming, web development, and basic knowledge of data science and cloud. I am serious, responsible, and always ready to learn new technologies. I enjoy working on projects, improving my skills, and growing step by step in the tech field.

WORK EXPERIENCE

Web Developer | Laravel

APRIL 2023 - JUNE 2023

Service Régie Commune

Oued Zem, Morocco

- Worked with GIR, a municipal tax payment software, supporting various domains in the city.
- Applied knowledge in software development to design and implement solutions for real-world problems.
- Developed a dynamic web application for managing human resources processes, improving efficiency and automation.

Web Developer | React.js

August 2022 - September 2022

Haut Commissariat au Plan (HCP)

Rabat, Morocco

- Collaborated with the team using statistical software to analyze data.
- Developed a statistical application to support reporting and decision-making.
- Prepared statistical projects using Excel and presented/discussed results within the team.

EDUCATION

Master's Degree in Digital Sciences and Artificial Intelligence

Faculty of Sciences Rabat

2024 - Present

Bachelor's Degree in Mathematics and Computer Science

Multidisciplinary Faculty Khouribga

2023 - 2024

University Diploma of Technology (DUT)

Higher Normal School Marrakech,

2021 - 2023

Baccalaureate in Mathematical Sciences A

Ibn Tofil High School Oued Zem

2019 - 2020

PROJECTS

• E-commerce Website | React.js

- Developed a fully responsive e-commerce platform with modern UI/UX using React.js and Tailwind CSS.

• University Management Website | Laravel (Backend) & React (Frontend)

- Built a complete web application for university management with Laravel REST APIs and React.js for the frontend.

• Web Application | Laravel & MySQL

- Designed and developed a dynamic web application with Laravel and SQL database integration.

• Machine Learning Project | Python

- Implemented a machine learning model to predict car prices based on datasets, using Python (pandas, scikit-learn).

• Networking Project | Routing (Static & Dynamic)

- Configured and tested static and dynamic routing on routers to enhance network performance and reliability.

• Data Science Project | Python, Pandas, Scikit-learn

- Performed data cleaning, feature engineering, and analysis on large datasets to extract actionable insights.
- Built predictive machine learning models using Random Forest, XGBoost, and SVM.
- Visualized results using Matplotlib and Seaborn to support data-driven decisions.
- Applied NLP techniques for text classification and sentiment analysis.

• Web Application Deployment | Angular (Frontend) & FastAPI (Backend) with Docker

- Developed a full-stack web application with Angular for frontend and Python FastAPI for backend.
- Containerized both frontend and backend services using Docker, ensuring portability and consistent environments.
- Configured Docker Compose to run multiple containers seamlessly.
- Implemented deployment workflow, making it easy to launch and scale the application on any server.

• NLP Project | GPT-based Text Processing

- Developed an AI-powered text application using GPT for natural language understanding and generation.
- Implemented tasks such as text classification, summarization, and question-answering using GPT models.
- Built a user interface to interact with the model and deployed it for demonstration purposes.
- Applied Python, Transformers library, and NLP best practices to ensure high accuracy and performance.
